PROJECTS & OPEN SOURCE CONTRIBUTIONS

Document Processing Pipeline

GOOGLE DOCS AI, OCR, AWS S3

- Designed and trained AI models to classify and extract key fields (addresses, dates, expiry intervals) from Gas Certs and EICRs. Integrated large-scale testing workflows using AWS S3 (30k+ documents) with automated re-training for accuracy.

Social Network App

PHP, BOOTSTRAP, JAVASCRIPT, MYSQL

- Developed a web app concept featuring user authentication, email verification, password reset, and editable profiles with image uploads.

Portfolio Site

BOOTSTRAP, AOS, JAVASCRIPT (WWW.KALENYOUNG.CO.UK)

- Built a responsive personal website to showcase web development projects, with a focus on clean UI, accessibility, and usability.

Angular Gallery & Slideshow

ANGULAR, SUPABASE, CLOUDINARY

- Built a dynamic photo gallery and slideshow app with folder management, modal previews, and upload features. Integrated Supabase for data storage and Cloudinary for image handling.

Role Playing Game

JAVASCRIPT

- Coded a browser-based RPG to strengthen core programming knowledge including logic, functions, conditionals, loops, and object handling.

Todo App & Time Tracker

PHP, MYSQL, BOOTSTRAP

- Created productivity apps with full CRUD operations, deadline tracking, and real-time session tracking to improve task management.

EDUCATION & CERTIFICATES
